21st October 2015

Event Invitation

The Software Industry Student Group (SISG) at Swinburne University of Technology invites interest to attend an upcoming networking event.

Looking for IT Jobs this summer
Monday 26th October 2015, 17:30 – 19:30
Level 2, The George Swinburne Building (GS217)
Swinburne University of Technology, Hawthorn Campus

The aim of this event is to link students with summer projects, internships, research opportunities and graduate positions.

We are currently looking for organisations, small business, and start-ups to pitch opportunities to our students. Summer projects could be a few days to a few months in duration. Pitches would be approximately 5 minutes per organisation. Once all pitches are delivered, we intend to foster a safe environment for you to discuss opportunities directly with students. We encourage more than one representative from each pitching organisation.

Our members will likely ask about:
- Mandatory and desirable skills (technical and soft skills),
- Expected start dates and duration of this opportunity,
- Eligibility for international student applications,
- Location and benefits of your opportunity.

Presentation equipment will be available. To ensure smooth flow of this event, please supply us with any supporting files prior midday (12:00pm) on the day of the event. The content of presentation files remain your property and will be securely removed directly after the event. We will be updating our social media and website soon with more information.

Further networking opportunities are available for organisations who would like to connect with our members. Even if not pitching, you are most welcome to contact us to discuss further.

Please RSVP to connect with SISG members
